MEET THE START-UPS:

GREENBIN

IOT company that focuses on smart waste management systems for urban bins. GreenBin offers machine learning solutions, provides daily route planning suggestions and predicts future waste disposal patterns

NRGSTOREDGE

Patented energy storage technology that can change the game rules in vehicles market, hydrogen transportation and other fields.

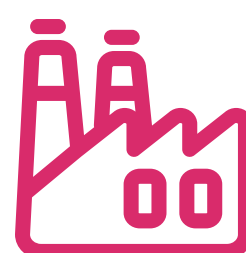

PAYKEY

Social payment solution that enables banks to provide their users with peer-to-peer payment options through any social or messaging platform

PLASTIC2NRG

Plastic2Nrg Ltd seeks to transform plastic waste into a profitable asset with its Plastic-to-Energy units for waste management plants.
